

**Mary B. Quinton, M.C.S.P., MBE** was a physiotherapist who trained early with Berta Bobath and went on to develop effective early treatment of infants in Switzerland, with the support of pediatrician Dr. Elsbeth Kong. Ms. Quinton continued to actively treat and teach up until her passing. Her work has become the foundation for the establishment of baby treatment programs in most major countries of the world. She completed a text on her work "Concepts & Guidelines in Baby Treatment," prior to her death and this exceptional work is her legacy and contribution to therapists and babies around the world. This program consists of her teaching videos in seminar format along with expanded treatment footage with babies.
